July 25, 2006

To whom it may concern,

The Gard Tec Security Box is designed and manufactured by W. & E. Phillips Locksmith Incorporated. W. & E. Phillips Locksmith Incorporated is the sole source of this product. The box is made in three sizes at this time and is available with five different locking mechanisms. We presently offer a keypad only, keypad with proximity reader, magnetic strip reader, magnetic strip reader with keypad, and a proximity only reader. The systems are designed to be programmed using a software package that allows you to audit the lock and print reports. For additional information please contact us.

Thank you
Gary Phillips
President
